30 DAY PROGRAM

A RECOV PLAYBOOK

Femme Body *30 Day Slimdown*

Your home workout and flexible
nutrition blueprint — no gym, no
guesswork, just results.

YOUR COACH

Daniel Delahunty

POWERED BY

RECOV

START HERE

No more feeling like a failure. *This is your reset.*

Kickstart your fitness journey with the Femme Body 30-Day Slimdown — your ultimate blueprint to shedding unwanted kilos, gaining confidence, and feeling like a queen.

Start creating sustainable healthy habits without all the guesswork. Whether you're just starting out or need a reset, this program provides the structure, motivation, and support you need to succeed. Ease back into a healthy routine, exercise from your home and eat the foods you love. It's your time to unleash your inner brilliance and shine bright once again.

WHAT'S INSIDE

Your 30-day roadmap

1

The Game Plan

Why this program works — and how to use it.

2

Daily Coaching Videos

30 days of guided coaching, one topic per day.

3

Nourish to Flourish

Energy balance, calories, macros and flexible dieting.

4

Recipe Collection

Macro-counted breakfast, lunch, dinner and snack ideas.

5

Home Workout Program

Progressive bodyweight training — Phase 1 through Phase 2.

6

Sleep & Recovery

Why rest is the other half of the equation.

CHAPTER 01

The Game Plan

Break Free & Take Control

Most diets and fitness programs fail because they demand too much, too soon. Maybe you've struggled with restrictive meal plans that leave you feeling deprived, or you've tried complicated workouts that don't fit into your busy lifestyle. The truth is, fat loss doesn't have to be overwhelming — it just needs to be **sustainable**.

The Femme Body 30-Day Slimdown is designed to help you build simple, balanced habits that fit into real life. This isn't about endless hours in the gym or eliminating your favourite foods.

- **Effective bodyweight workouts** that create resistance and build strength right from home — no equipment needed.
 - **Mindful eating through flexible dieting**, so you can eat foods you enjoy while still making progress.
 - **A manageable calorie deficit** based on how much energy your body actually needs.
- Over these 30 days, you'll begin to see progress — not just in the mirror, but in your mindset. You'll move better, feel stronger, and develop habits that make maintaining a leaner, healthier body second nature. No more all-or-nothing approaches. This is about learning what works, creating balance, and setting yourself up for lasting success.

*Ready to take control?
Let's do this — together.*

CHAPTER 02

Daily Coaching Videos

Every day for 30 days, you'll get a short coaching video covering a specific topic — from mindset to macros, plateaus to meal prep. Here's what's waiting for you.

Day 1 Welcome & Mindset Shift ▶

Day 2 First Home Full Body Workout ▶

Day 3 Understanding TDEE & Deficit ▶

Day 4 Flexible Dieting & 80/20 Rule ▶

Day 5 Tracking & Awareness ▶

Day 6 Daily Movement — Steps ▶

Day 7 Hydration & Electrolytes ▶

Day 8 Upper/Lower Body Split ▶

Day 9 Protein Prioritisation ▶

Day 10 Strength Training for Fat Loss ▶

Day 11 What Is Progressive Overload ▶

Day 12 Managing Hunger & Cravings ▶

Day 13 Meal Prepping Made Simple ▶

Day 14 Self-Sabotage & Motivation ▶

Day 15 Tracking Progress Beyond the Scale ▶

Day 16 Eating Out & Fast Food Choices ▶

Day 17 Sleep & Recovery ▶

Day 18 Metabolism Myths ▶

Day 19 Meal Timing & Macros ▶

Day 20 Consistency Over Time ▶

CHAPTER 03

Nourish to Flourish

When it comes to fat loss, nutrition plays a crucial role. The key is creating a caloric deficit — consuming fewer calories than your body burns each day — while maintaining a balanced, nutritious diet.

To support fat loss, it's recommended to consume a diet high in protein, as protein helps keep you feeling full and can help preserve muscle mass. Meal planning and tracking your food intake are helpful tools. Sustainable fat loss is a gradual process — fad diets and extreme restrictions are not sustainable or healthy.

Energy Balance & Fat Loss

The number one rule of fat loss is establishing a calorie deficit. To lose body fat, we must burn more calories than we consume, resulting in a negative energy balance. Without a calorie deficit, the body cannot lose fat.

Maintain

CALORIES IN = CALORIES OUT

Lose

CALORIES IN < CALORIES OUT

Build

CALORIES IN > CALORIES OUT

Calculate Your Calories

We all need different amounts of food to lose fat, build muscle or maintain weight. Here's a simple way to find your starting point.

1 Find your TDEE — Total Daily Energy Expenditure. Use a free calculator like tdeecalculator.net. Enter your gender, age, weight, height and activity level to get your daily maintenance calories.

2 Set your goal — Subtract 300–500 calories from your TDEE. This creates a weekly deficit of 2,100–3,500 calories, equivalent to losing roughly 0.3–0.5 kg of fat per week.

EXAMPLE

- A female with a TDEE of 2,132 calories wanting to lose ~500g/week would set her starting calories at **1,632 calories**.
- Monitor your weight weekly and adjust as needed — this is an estimate, not an exact science.

Master Your Macros

Macronutrients — protein, carbohydrates and fats — are the three essential nutrients that provide energy.

- **Protein (4 cal/g):** Essential for building and repairing tissue. Aim for 1.5–2g per kilogram of body weight. A 60 kg woman training consistently should target around 120g daily (480 calories).
- **Fat (9 cal/g):** Important for hormones, organ insulation and nutrient absorption. Aim for 20–35% of daily calories. On a 1,632 cal diet, that's roughly 54g fat (490 calories).
- **Carbohydrates (4 cal/g):** Your body's primary energy source. Fill in the remaining calories after protein and fat. On a 1,632 cal diet: $1,632 - 480 - 490 = 662$ calories → **165g carbs**.

EXAMPLE · 1,632 KCAL FAT-LOSS PLAN

Daily targets

120g

PROTEIN

30% · 480 kcal

165g

CARBS

40% · 662 kcal

54g

FATS

30% · 490 kcal

Macro Food Choices

PROTEIN SOURCES

- Eggs — 7g per large egg
- Chicken breast — 18g per 85g
- Salmon — 22g per 85g
- Canned tuna — 22g per 85g
- Greek yogurt — 14g per ½ serve
- Whey protein — 24g per scoop
- Tofu — 12g per 100g
- Turkey breast — 24g per 85g

CARB & FAT SOURCES

- Sweet potato — 20g carb/100g
- Brown rice — 23g carb/100g
- Oats — 55g carb/100g
- Banana — 27g carb/medium
- Avocado — 15g fat/100g
- Olive oil — 14g fat/tbsp
- Almonds — 14g fat/25g
- Dark chocolate — 11g fat/20g

Create Your Meal Plan

- 1 **Set your calories and macros** using the calculations above.
- 2 **Plan your meals** — map out breakfast, lunch, dinner and snacks. Consider foods you enjoy and the macros you've chosen.
- 3 **Make a grocery list** from your planned meals to save time and money.
- 4 **Track your progress** — use MyFitnessPal to log food intake and stay accountable.

Flexible Dieting

If rigid meal plans have failed you, flexible dieting — also known as "If It Fits Your Macros" (IIFYM) — is a sustainable approach that tracks macronutrients instead of following strict food lists. It prioritises nutritional balance while leaving room for your preferences and lifestyle.

HOW TO START FLEXIBLE DIETING

- **Calculate your needs:** Use a TDEE calculator, then subtract 300–500 calories for a deficit.
- **Set your macros:** Protein 1.5–2g/kg, Fats 0.8–1g/kg, Carbs fill the remaining calories.
- **Get 25g+ fibre daily** for digestion and fullness.
- **Track using MyFitnessPal:** Log meals, scan barcodes, adjust portions.
- **Can you eat out?** Yes! Look up meals ahead of time, estimate portions, make smart swaps.

This isn't about being perfect — it's about building habits that last. Start small, stay consistent, and create a lifestyle you love.

Meal Frequency

The idea that eating smaller, more frequent meals helps fat loss has limited scientific support. The key to fat loss is creating a calorie deficit — how you distribute those calories across meals depends on your individual lifestyle, preferences and goals. Focus on nutrient-dense foods that support overall health rather than relying on meal timing alone.

Macro-counted recipes to keep you fuelled and on track — from hearty breakfasts to satisfying dinners and smart snacks.

Breakfast Recipes

Spanish Zucchini Tortilla

Serves: 2 · Prep: 10 min · Cook: 25 min

377
KCAL

22g
CARBS

22g
FATS

21g
PROTEIN

INGREDIENTS

- 1 tbsp olive oil
- 1 small potato, peeled, chopped
- 1 small onion, chopped
- ½ small zucchini, thinly sliced
- 6 eggs

METHOD

1. Heat oil in a non-stick pan, sear potato and onion 4 min. Add zucchini, sauté 4 min.
2. Whisk eggs with salt and pepper, stir in veg.
3. Pour into the pan on low heat, cook 8–10 min.
4. Flip using a plate, cook another 5–6 min. Serve.

High Protein Blueberry Pancakes

Serves: 1 · Prep: 5 min · Cook: 10 min

257
KCAL

18g
CARBS

5g
FATS

36g
PROTEIN

INGREDIENTS

- ¼ cup liquid egg whites (~4 eggs)
- 1 scoop (25g) vanilla whey powder
- ½ banana, mashed
- Almond milk, if needed
- ¼ cup fresh or frozen blueberries
- ½ tsp coconut oil

METHOD

1. Whisk egg whites with protein powder.
2. Stir in mashed banana and blueberries. Add almond milk if too thick.
3. Heat coconut oil on low-medium, pour batter, cook ~5 min until bubbles form.
4. Flip, cook 2–3 min more. Serve with favourite toppings.

Eggs Fried on Tomato with Tuna

Serves: 1 · Prep: 5 min · Cook: 5 min

307
KCAL

8g
CARBS

15g
FATS

32g
PROTEIN

INGREDIENTS

- 1 large tomato
- 1 tsp coconut oil
- 2 eggs
- 80g tuna in brine
- Oregano, chili flakes, parsley

METHOD

1. Peel and chop tomato. Fry in oil on high heat 3 min.
2. Create gaps, crack eggs in. Season, add tuna on top.
3. Sprinkle oregano and chili. Fry until whites are set. Serve with parsley.

Lunch & Dinner Recipes

Cajun Beef with Veg Rice

Serves: 3 · Prep: 10 min · Cook: 25 min

503
KCAL

55g
CARBS

13g
FATS

40g
PROTEIN

INGREDIENTS

- 1 tbsp coconut oil
- 3 large carrots, sliced
- 2 peppers, sliced
- 4 spring onions, sliced
- 500g 5% fat beef mince
- 2 tsp Cajun seasoning
- 1 tbsp tomato purée
- 500g cooked rice

METHOD

1. Heat oil, sauté carrots, peppers and spring onion whites for 10 min.
2. Add beef, season, cook 10 min until browned.
3. Stir in Cajun seasoning and tomato purée. Add rice + 4 tbsp water.
4. Combine and heat 3–4 min. Top with spring onion greens.

Beef & Green Bean Pasta

Serves: 2 · Prep: 10 min · Cook: 15 min

491
KCAL

53g
CARBS

12g
FATS

44g
PROTEIN

INGREDIENTS

- 120g whole-wheat pasta
- 300g beef steak, thinly sliced
- 4 spring onions
- 2 cloves garlic
- 1 tbsp coconut oil
- 2 tbsp soy sauce
- 80ml beef stock
- 100g frozen green beans

METHOD

1. Cook pasta per packet. Slice beef thinly.
2. Cook beef 3 min, transfer to plate, drizzle with soy sauce.
3. Sauté garlic and spring onion 3 min.
4. Return beef, add stock and beans. Cook 2–3 min, add pasta, toss 2 min.

Pepper Steak with Red Peppers

Serves: 2 · Prep: 10 min · Cook: 15 min

438
KCAL

28g
CARBS

16g
FATS

42g
PROTEIN

INGREDIENTS

- 340g round beef, trimmed, thinly sliced
- Soy sauce, rice wine, buckwheat flour
- 2 tsp coconut oil
- 1 large onion, sliced
- 1 red bell pepper, sliced
- Black pepper, red pepper flakes

METHOD

1. Marinate beef in 4 tsp soy sauce, rice wine, 1 tsp flour and pepper.
2. Mix sauce: 3 tbsp soy, 1 tbsp water, 2 tsp flour. Set aside.
3. Sear beef on high 2 min. Remove. Cook peppers and onion 4–5 min.
4. Return beef, add sauce and red pepper flakes. Stir fry 30–60 sec. Serve with rice.

Snack Recipes

Matcha Chia Pudding

Serves: 2 · Prep: Overnight · Cook: 0 min

275
KCAL

19g
CARBS

9g
FATS

23g
PROTEIN

INGREDIENTS

- 30g chia seeds
- 1½ cups almond milk
- 2 tsp maple syrup
- 40g soy protein isolate
- 1 tsp matcha
- 100g fresh or frozen berries

METHOD

1. Mix chia seeds and almond milk. Refrigerate 1 hour, stir, then chill overnight.
2. Next morning, mix in maple syrup, protein powder and matcha.
3. Divide between two bowls and serve with berries.

Cherry Sorbet

Serves: 4 · Prep: 10 min · Freeze: 60 min

109
KCAL

24g
CARBS

1g
FATS

2g
PROTEIN

INGREDIENTS

- 400g frozen pitted cherries
- 2 tbsp honey
- 1 tbsp lemon juice
- 4 tbsp vanilla soy yogurt
- 4 tbsp water
- Mint leaves, to serve

METHOD

1. Blitz all ingredients in a blender until smooth.
2. Spoon into a freezer-proof container, freeze 1 hour.
3. Scoop into glasses, top with mint. Serve immediately.

Protein Fruit Bowl

Serves: 1 · Prep: 5 min · Cook: 0 min

305
KCAL

26g
CARBS

9g
FATS

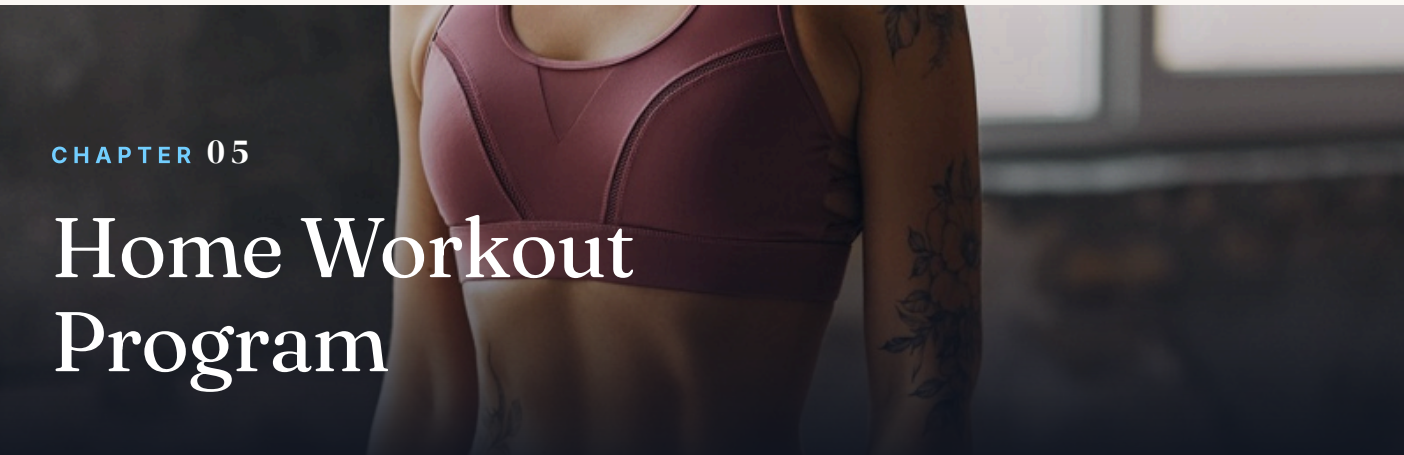

34g
PROTEIN

INGREDIENTS

- 100g natural Greek yogurt
- 30g vanilla whey protein isolate
- 5 strawberries, halved
- ½ banana, sliced
- 1 tbsp coconut chips

METHOD

1. Mix whey protein into Greek yogurt until smooth.
2. Spoon into a bowl, top with fruit and coconut chips.

CHAPTER 05

Home Workout Program

The most important factor for fat loss is creating a calorie deficit — and exercise is one half of that equation. This program uses bodyweight-only workouts you can do anywhere, with progressive overload built in so your muscles are continuously challenged over 30 days.

- **Step activity:** Start with 7,000 steps daily, increasing by 1,000 every 5 days. Use Apple Health or Google Fit to track.
- **HIIT:** Short bursts of high-intensity exercise followed by rest — burns calories and boosts metabolism.
- **Strength training:** Builds muscle, increases metabolism, and targets multiple muscle groups with compounds.
- **Circuit training:** Exercises performed back-to-back to keep heart rate elevated while building endurance.

Warming Up & Stretching

Warming up before training helps prevent injury and improves performance. Start with light cardio or dynamic stretching — leg swings, arm circles — to increase heart rate and blood flow. Key stretches: Cross-Body Shoulder Stretch, Garland Pose, Front Lunge Hold, Seated Spinal Twist.

The 30-Day Training Calendar

Days 1–7: Full body workouts (5 exercises, 3 sets × 12 reps)

1 FULL BODY	2 FULL BODY	3 REST	4 FULL BODY	5 FULL BODY	6 FULL BODY	7 REST
----------------	----------------	-----------	----------------	----------------	----------------	-----------

Days 8–14: Upper/Lower split (5 exercises, 3 sets × 12 reps)

8 UPPER	9 LOWER	10 REST	11 UPPER	12 LOWER	13 REST	14 UPPER
------------	------------	------------	-------------	-------------	------------	-------------

Days 15–21: Upper/Lower split (5 exercises, 3 sets × 15 reps)

15 LOWER	16 REST	17 UPPER	18 LOWER	19 REST	20 UPPER	21 LOWER
-------------	------------	-------------	-------------	------------	-------------	-------------

Days 22–30: Upper/Lower split (5 exercises, 3 sets × 18 reps)

22 REST	23 UPPER	24 LOWER	25 REST	26 UPPER	27 LOWER	28 REST
------------	-------------	-------------	------------	-------------	-------------	------------

29 UPPER	30 LOWER
-------------	-------------

Phase 1 · Days 1–7 — Full Body

Phase 1 Full Body Workout

Squat (Chair Squats) [▶ video](#) **3 × 12**

Stand shoulder-width, lower as if sitting. Regression: use a chair for support.

Push Up (Wall or Bench) [▶ video](#) **3 × 12**

High plank, lower chest, push back up. Regression: incline on bench or wall.

Glute Bridge (Feet Flat) [▶ video](#) **3 × 12**

Lie on back, drive through heels, squeeze glutes at top. Hold 1–2 sec.

Superman Arm Lift [▶ video](#) **3 × 12**

Lie face down, lift arms/chest/legs together, squeeze glutes and back. Hold 1 sec.

Plank Hold [▶ video](#) **3 × 15 sec**

Forearm plank, core tight, hips level. Modify on knees if needed.

Phase 2A · Days 8–30 — Upper Body

Upper Progressive Bodyweight

Incline → Full Push Ups [▶ video](#) **3 × 12→18**

Start on bench, progress to floor as strength builds.

Superman Lifts with Squeeze [▶ video](#) **3 × 12→18**

Lift chest/arms/legs, hold 2 sec, extend arms to T, squeeze shoulder blades.

Standing Lateral Raises [▶ video](#) **3 × 12→18**

Use 600ml water bottles. Raise to shoulder height, lower slowly.

Seated Tricep Dips [▶ video](#) **3 × 12→18**

Hands on chair edge, legs straight. Lower to 90°, push back up.

Plank Hold [▶ video](#) **3 × 30s→60s**

Forearm plank, progress hold time each phase.

DAYS 8-14

3 × 12

30 sec plank

DAYS 15-21

3 × 15

45 sec plank

DAYS 22-30

3 × 18

60 sec plank

Phase 2B · Days 8-30 — Lower Body

Lower Progressive Bodyweight

Squat [▶ video](#)

3 × 12→18

Feet shoulder-width, lower until thighs parallel. Drive through heels.

Single-Leg Glute Bridge [▶ video](#)

3 × 12→18

Extend one leg straight, press through planted heel, squeeze glutes.

Reverse Lunge [▶ video](#)

3 × 12→18

Step back, lower back knee toward floor, push through front heel.

Standing Calf Raise [▶ video](#)

3 × 12→18

Press through balls of feet, pause at top 1-2 sec, lower slowly.

Wall Sit [▶ video](#)

3 × 15s→45s

Back against wall, knees at 90°. Hold position, progress time each phase.

DAYS 8-14

3 × 12

15 sec wall sit

DAYS 15-21

3 × 15

30 sec wall sit

DAYS 22-30

3 × 18

45 sec wall sit

If you are a beginner or just starting back, remember — it does not have to be perfect. Just keep trying your best and keep pushing yourself.

CHAPTER 06

Sleep & Recovery

Getting adequate sleep is important for overall health and can also support your fat loss goals. Lack of sleep disrupts hormones that regulate appetite, leading to increased hunger and cravings — and it makes it harder to stick to healthy habits.

Research shows that getting enough sleep (generally 7–9 hours per night) supports healthy hormone levels, reduces cravings, and helps your body recover from exercise — an important component of any fitness program.

SLEEP HYGIENE CHECKLIST

- Establish a consistent bedtime routine.
- Avoid caffeine and electronics before bed.
- Create a comfortable, dark sleep environment.
- Aim for 7–9 hours of quality sleep per night.
- Prioritise sleep alongside diet and exercise for lasting results.

Prioritise adequate sleep alongside healthy eating and regular physical activity for sustainable results and optimal health.

Reflections Daily Tracker

Use a daily tracker to log your **steps**, **sleep hours**, **energy level (/10)**, **water intake (litres)** and **mood (/10)** for each of the 30 days. Tracking builds awareness — you'll start to see patterns between sleep, energy and progress. Print or copy this tracker into a journal for daily use.

RECOVER FASTER

The recovery half of the equation

Training breaks you down; recovery builds you back. The fastest way to feed a freshly-trained muscle is amino acids it can absorb immediately — that's the gap Recov fills, supporting your body's natural recovery process alongside proper nutrition and rest.

Recov

The science-led recovery formula

- All 20 amino acids — the full set your body needs
- Pre-digested & absorbed in ~15–20 minutes
- Ideal post-workout and before bed
- No bloat — built by a scientist, formulation first

Train hard. Recover like you mean it.

Run the 30-day program, dial in your nutrition, and give your recovery the same precision. Start your first bottle of Recov.

[Shop Recov →](#)

[Learn more](#)

Train the program alongside Recov. If your recovery doesn't feel sharper, we'll make it right — just reach out.

Ready to take your training further? Pair this program with Recov for science-led recovery support.
